

DITTO D

SOC ANALYST L1

+91 8438710313 | dittodickson03@gmail.com | linkedin.com/in/dittodickson | github.com/ditto03

SUMMARY

B.Sc. Computer Science graduate and EC-Council Certified SOC Analyst (CSA) with hands-on experience in security monitoring, log analysis, alert triage, and incident investigation using Splunk. Skilled in identifying suspicious activity, analyzing authentication logs, and applying SOC monitoring workflows to detect and respond to security events. Familiar with the OWASP Top 10, TCP/IP networking, and Windows/Linux environments. Eager to contribute to a Security Operations Center team as a Tier 1 analyst.

CORE COMPETENCIES

Security Monitoring | Log Analysis | Alert Triage | Incident Investigation | SIEM (Splunk) | Threat Detection | IOC Identification | OWASP Top 10

TECHNICAL SKILLS

SIEM & Log Analysis: Splunk (SPL queries, log analysis, event correlation, alert triage, security monitoring, threat detection)

Security Concepts: OWASP Top 10, IOC identification, alert prioritization, threat detection, incident triage, cybersecurity fundamentals

Network Security: Wireshark (packet analysis, network traffic monitoring, protocol analysis, network troubleshooting, traffic inspection, basic threat detection)

Web Security Testing: Burp Suite (HTTP/HTTPS traffic analysis, request manipulation, vulnerability assessment, web application security testing)

Operating Systems: Windows, Linux, and Kali Linux administration, command-line operations, and log analysis

Networking: TCP/IP, DNS, HTTP/HTTPS, network protocol analysis, port communication, basic network troubleshooting

Network Scanning & Enumeration: Nmap (host discovery, port scanning, service enumeration, version detection, network reconnaissance, security risk identification)

PROJECTS

SIEM Log Analysis & Threat Detection using Splunk | *Splunk · SPL · Linux · Log Analysis · Real-Time Alerting*

- Configured Splunk to ingest and monitor Ubuntu SSH authentication logs (/var/log/auth.log) for real-time security event analysis.
- Wrote SPL queries to detect and investigate failed SSH login attempts, brute-force patterns, and repeated authentication failures from specific source IPs.
- Analyzed authentication logs to identify potential Indicators of Compromise (IOCs) and correlated events across log sources to reduce false positives.
- Built and tested a real-time Splunk alert for "Failed password" events, enabling immediate detection and tracking of unauthorized SSH access attempts.
- Conducted alert triage by assigning severity levels and prioritizing security events based on potential business impact.

Communication Barrier Nullifier Using Machine Learning | *Python · OpenCV · MediaPipe · Scikit-learn*

- Developed a real-time Python application using MediaPipe and OpenCV to detect hand landmarks and classify sign-language gestures.
- Built and evaluated multiple machine learning models (Random Forest, AdaBoost, Gradient Boosting, Hybrid Stacking) to improve classification accuracy.
- Performed data preprocessing, feature extraction, model training, and performance evaluation using supervised learning techniques.
- Strengthened Python programming, debugging, and systematic problem-solving skills through end-to-end system development.

CERTIFICATIONS

EC-Council Certified SOC Analyst (CSA) — Security monitoring, Incident detection and response, Threat intelligence, Alert triage, Log analysis

EDUCATION

B.Sc. Computer Science Sathyabama Institute of Science and Technology | 2022 – 2025 | CGPA: 7.65

12th Grade Pius XI Higher Secondary School | 2020 – 2022 | 64.83%

10th Grade St. Joseph High School | 2019 – 2020 | 95.6%

LANGUAGES

Tamil | English | Malayalam
